

The logo for ELVAL COLOUR, featuring a stylized 'E' icon to the left of the text 'ELVAL COLOUR' in a bold, sans-serif font. The text is white and positioned in the upper left quadrant of the page.

ELVAL COLOUR

A large, circular frame in the center of the page shows a modern building with a curved facade and many windows. The building is partially obscured by a large, stylized 'E' shape that is filled with a blue and white striped pattern. The background of the entire page is a dark, abstract composition of overlapping geometric shapes in shades of blue and grey.

STANDARD COLOUR GUIDE with UNLIMITED POTENTIAL

ELVAL COLOUR is one of the leading aluminium coil coating companies in Europe with a production of more than 35 million m² per year. With over 30 years of experience in colour matching and coating, ELVAL COLOUR is an excellent partner for your projects.

ELVAL COLOUR is member of the European Coil Coating Association (ECCA), the European Aluminium Association, and is ISO 9001-2008, ISO 14001-2004 and OHSAS 18001 accredited.

ELVAL COLOUR's coated aluminium products are available in various colour shades presenting a wide selection of standard or custom made solutions for the building envelope. Applied by a sophisticated continuous coil coating process, our

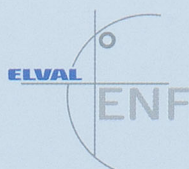

multilayer paint systems offer advanced resistance to aggressive weather conditions, polluted environments and UV-radiation.

The presented colour shades are based on metal chips, cut out from the respective coated aluminium coils. As a consequence, they are well placed as colour matching samples. As with all coating procedures, especially for metallic colours, there might be a small degree of colour variation from batch to batch.

In order to ensure colour consistency, we recommend placing a project order in one batch. All metallic colours have to be installed following the arrow direction printed on the protective film and on the back side of the panel & coils in order to avoid colour variations.

All of the enclosed colours are available in standard widths 1250 and 1500mm starting from a minimum quantity of 300 m², per width and thickness.

For ENF and OROFO products all of the enclosed colours are available in standard widths, starting from minimum order quantity of 1200 m², per width and thickness.

a friend to the environment

- The **ELVAL COLOUR** products are available in a wide range of colours and coatings to match all building envelope façade & roofing requirements. From scratch resistant to superweathering performance from vibrant to conservative shades ready to contribute to any architectural vision.
- **ELVAL COLOUR** uses coatings that are
 - Lead (Pb), Chrome (Cr) and Isophorone (IF) Free
 - REACH compliant as per 1907/2006/EU
 - RoHS compliant as per the Restriction of Hazardous Substances Directive 2002/95/EU
- Our coating process complies with all European norms and quality standards DIN, ASTM, BS, EN, ISO and ECCA, has a zero liquid waste discharge system and is fully compliant with the Industrial Emissions' Directive (IED) 2010/75/EU.

custom-made Colours

ELVAL COLOUR's specialized personnel will assist you in identifying and implementing the best possible coating system for your building. Cost, quality, aesthetics and speed of delivery will be all optimized with a view to maximize the performance, weathering resistance, and visual impact of your project.
